

Q&A;: LawnStarter - Software Engineer

Q: Why do you want to work at LawnStarter?

A: I'm excited by LawnStarter's focus on innovation in the landscaping industry and building scalable solutions. My experience modernizing legacy systems and architecting new applications, as demonstrated at Sony Pictures, aligns well with your engineering challenges, and I'm eager to contribute to a growing platform.

Q: Describe your experience with Python and React.

A: I have extensive experience with React, developing advanced UI features at Sony Pictures, as well as multiple personal projects using Next.js and Gatsby. While my primary backend experience at Sony Pictures was with Java Spring Boot, I also have experience using Python, and have used it to build backends including ETLing over 10 million records in PostgreSQL for my Dolores project.

Q: Tell us about a time you automated a workflow successfully.

A: As Environmental Manager at Sony Pictures, I automated the environment management process, ensuring seamless utilization by developers and QA testers, resulting in increased efficiency and reduced downtime. I also automated data cleanup using data fix scripts with Oracle and MarkLogic databases, improving data integrity and saving the team significant time.
